

# TrueiDetect

## COMPREHENSIVE PROTECTION FOR SECURE STRATEGIC BUILDINGS & CAMPUSES

In today's Mobile connected world, security concerns within strategic buildings, embassies, and campuses have become paramount. Among the most significant threats is the unauthorized use of personal mobile devices, posing risks of data theft and security breaches.

Strategic buildings, embassies, and campuses are prime targets for data theft, facilitated by the discreet use of personal mobile devices. The proliferation of mobile technology has exacerbated the risk, with potential data leakage and malware threats looming large.

# ENTRY - EXIT TRUE ID DETECTION SOLUTION UNCOMPROMISED SECURITY, EFFORTLESS IMPLEMENTATION.

Shyam VNL's Entry-Exit Identification (EEI) Solution is the ultimate solution for comprehensive mobile phone detection and access control. It is fully automated and designed to address the unique security needs of secure strategic buildings, embassies, and campuses.

The solution is automatic and designed to address unique security challenges faced by Secure strategic buildings, embassies, and campuses.

# SOLUTION'S HIGHLIGHTS

## Automated Identification

TrueiDetect records the number of individuals entering the premises and verifies their identities, ensuring comprehensive security coverage.

## RF Sanitization

Ensures the strategic building area remains RF sanitized, safeguarding against unauthorized mobile device usage.

## Suspicious Activity Alerts

Provide real-time alerts upon detecting suspicious individuals or devices, enabling proactive security measures.

## Walkthrough Mobile Phone Detection

At entry points, the system detects and records Unique Mobile devices, phone I.D.s of all individuals, enhancing security measures.

## Detecting, Identification & Location Finding

IMSI, IMEI data of all mobile devices (phones, tablets, dongles) and individuals, enabling precise detection and True identification.

## Integration with other Government Systems/Data Bases

Seamlessly integrate with government systems, associating mobile IDs with official biometric data and national identity documents.

## Key Benefits

- **Simple and Fast Deployment:** System offers hassle-free implementation, ensuring rapid deployment.
- **IPR Ownership:** Shyam VNL owns all intellectual property rights, software, and hardware, guaranteeing full control and accountability.
- **Comprehensive Coverage:** System detects, identifies and reports all mobile devices, phones being brought in within the target area, supporting diverse technologies (2G, 3G, 4G & 5G+).
- **Proven Reliability:** Leveraging advanced technology, our system boasts proven reliability, and it was conceived, designed, and manufactured in India.
- **Stand Alone System:** No dependency on Mobile Network Operators.

## Unleash the power of innovation with Shyam VNL

Unleash the power of innovation with Shyam VNL. Explore our comprehensive suite of solutions that empower every sector we serve to thrive in a secure and connected world.
